B-4000

Instant Boiling and Ambient
Filtered Water System

billihome.com.au

Introducing the Billi B-4000.

Great tasting boiling and ambient water, instantly.

Imagine the convenience of an instant supply of clean filtered, boiling or ambient water in your home, whenever you want it.

Along with a compact and elegant design, the B-4000 offers energy savings and cost savings. It also removes all impurities from the water source leaving you with an ongoing supply of healthy drinking water.

Next generation
drinking water system.

Convenience, functionality and style.

—Instant boiling water

With the innovative Billi electronic temperature regulation system and precise temperature monitoring functions, your hot water will be delivered as close to boiling point as possible. So you will never experience temperature drop off even during high use periods.

—High-tech filtration system

Certified by global public safety agency NSF International, Billi's premium sub-micron filters ensure that health-threatening pollutants and impurities such as sediment, chemicals, heavy metals, chlorine and pesticides are safely removed while fluorides are retained, leaving users with refreshingly clean drinking water, every time.

—Safety first

Safety is paramount in the design of the B-4000 dispenser. With its heat-insulated body and concealed childproof safety-switch, there is a high level of user protection. Billi's Splash Free™ boiling water delivery means that flow is electronically varied, slowing momentarily to eliminate splashing as the water first enters the cup.

—Energy efficient

Designed for maximum energy efficiency, the B-4000 features a large boiling capacity yet draws only a very minimal electrical current. This means less environmental impact and potential savings on power bills.

—High performance insulation

Superior insulation is critical to the sustainability performance of any integrated boiling system. Designed with environmental factors in mind, the B-4000 utilises Billi's unique Thermostore™ technology and sophisticated insulating materials to operate at a level of efficiency which exceeds 50 times that of traditional hot water tanks.

—Save on space

With a focus on space-saving, the tiny B-4000 has been designed to simply integrate into any storage module design. Less than half the size of other units on the market, it fits easily within a standard cupboard compartment.

—Flexible font positioning

Combining design flexibility with supreme functionality, the Billi Font can be easily installed wherever it is needed, whether in the sink area or elsewhere – maximizing the way space is utilised. And with its classic simplicity, the Billi Font will coordinate with other design features and appliances.

—Easy-change replacement filter

Replacing the B-4000 filter cartridge is simple. Flashing amber dispenser icons indicate when replacement is due. The swing-change filter simply swings forward and slides off. Fitting the new filter is just as easy – simply slide the filter in and swing it back. The cartridge locks into place.

—Disability conscious design

Designed for all users, the B-4000's lever operations meet current Australian Standards relating to access for people with a disability.

—Leakguard detection system

With the B-4000, there is no need to worry about water leakages. To ensure peace of mind, a watertight base tray and water detection system have been incorporated into the system's design. If a water leakage should ever occur, the water supply is instantly shut off.

—Replacement filters

Periodic replacement of filter cartridges is necessary to maintain water quality. Genuine replacement Billi filter cartridges are available online at www.billihome.com.au and from local approved suppliers. Cartridges are also available to suit the needs of different water supply areas.

—Warranty

All components of the B-4000 are covered by a 12-month warranty. Filter cartridges are a consumable and are not covered by warranty, as water conditions and usage vary.

Billi B-4000 options.

Optional brushed finish

Optional black finish

Billi B-4000 specifications.

—Options and accessories

- Dispenser finishes: Standard finish for the B-4000 dispenser is bright chrome. Brushed and black finishes also available.
- Billi Font: Allows the B-4000 to be located away from sink areas and finished in polished stainless steel. Brushed and black finishes also available.
- Dispenser riser: 65mm dispenser extension – supplied standard with the Billi Font. Finished in polished stainless steel. Brushed and black finishes also available.
- Extension kit: Available for installations where the dispenser needs to be offset from the underbench unit.

—Easy installation

The B-4000 dispenser features a unique top-mounting system, making it simple to install. There is no need to reach up behind sink bowls to secure clamps or tubes – the 'snap-fit' base is secured into the mounting hole, pipework is fed through from the top and the dispenser securely clips into place.

—Water supply

A single 15mm (1/2") stop-tap with a male thread should be installed in an easily accessible position. The water supply must be microbiologically safe to drink, with a minimum dynamic water pressure of 250kPa.

—Power supply

The B-4000 requires a standard 10 amp power outlet. It is supplied with a 1 metre flex cord and plug.

—Certifications

Every Billi drinking water appliance is manufactured under a certified quality control system. The B-4000 has been tested and complies with all required standards, including: Watermark Licence Number 21525; tested to AS3498 and AS/NZS4020; Victorian Electrical Safety Act 1998 Approval Number CS100600V; AS/NZS ISO 9002 Certificate Number QEC 11627; C-Tick approved; complies with AS1428 requirements for access for the disabled.

—Specifications

Product Code	—914000
Initial Water Delivery (Cups Per Hour)	—10
Boiling Water Delivery (Cups Per Hour)	—60
Heating Element (kw)	—1.5
Total Current Draw (amps)	—10
Height (mm)	—340mm
Width (mm)	—180mm
Depth (mm)	—360mm

*24-month warranty dependant on installation by Billi service technician.

Cupboard space saving
