

# Reducing plastic, waste and fossil fuel demand

Sustainable drinking water with Billi

**Despite having some of the best quality municipal water in the world, many Australians choose to drink water bottled in plastic.**

The damaging effects of plastic production (both for single use and other plastics) on the environment are impossible to ignore.

## Environmental impacts:

- Drives demand for fossil fuel production
- Excess energy and water consumption
- CO<sub>2</sub> emissions, waste generation, pollution
- Risks to human health

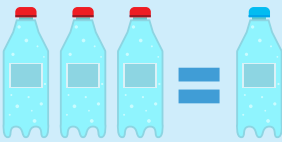

**x 720 million**

Litres of bottled water consumed by Australians each year.

**460,000**

Barrels of oil are used in the production of this water.

**1L from 3L**

One-litre bottle uses three litres of water to produce.

## Bottled water: a choice

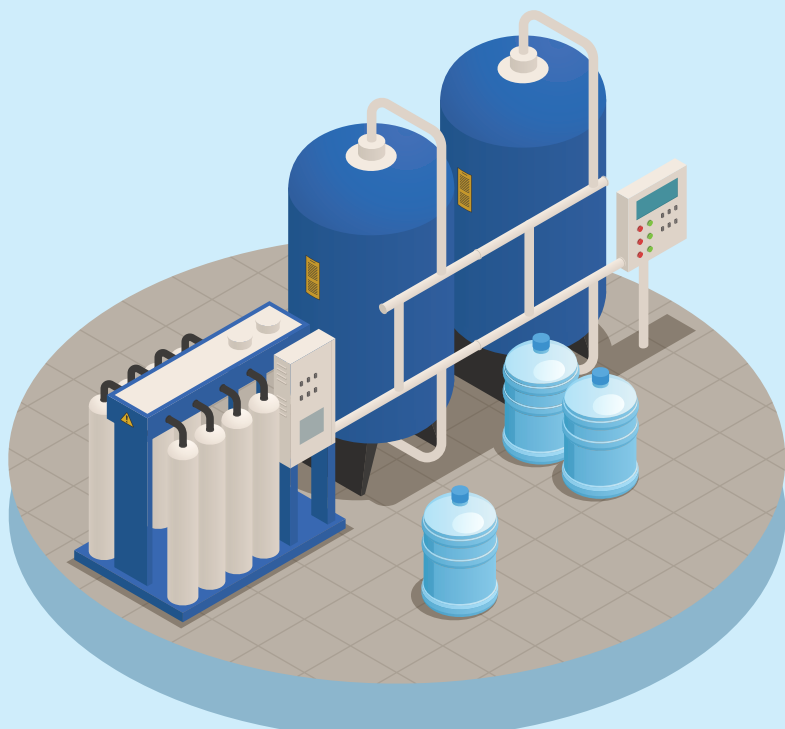

Australia's municipal water is rated amongst the highest quality in the world, but an estimated 30% of the Australian population consumes bottled water!

## Bottled water myths

- ☒ Bottled water is purer than tapwater
- ☒ Bottled water is healthier
- ☒ You need a separate carbonator for sparkling water

## Fact!

All bottled water comes from similar aquifers to municipal drinking water. This water is treated in the same process to be made safe for human consumption, basically the same as tap water!

## Instant filtered water systems: an environmentally friendly solution

Instant filtered water systems offer a variety of different types of water from a single long-life product

Boiled

Chilled

Still

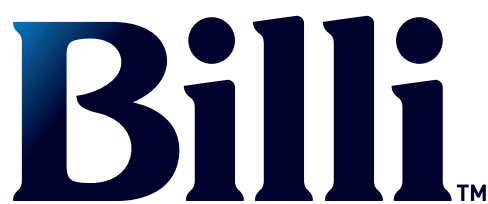

Sparkling

Filtered

## Benefits

- Encourages the use of cups or reusable vessels. Reduces plastic demand!
- Self-contained filters, boilers, chillers & carbonation.
- Long lasting and cost effective.
- Minimal transportation requirements. Reduces fossil fuel consumption!
- Self-servicing models and sustainable CO<sub>2</sub> canister replacement options.

## Billi Instant Filtered Water Systems

(a Global Hydration partnership with Waterlogic & Purezza brands)

For more than 30 years, Billi has been a leader in the provision of instant filtered water systems to the Australian market. Backed by a proud history of innovation, Billi Boiling & Chilled products are fully Australian designed and manufactured.

Billi operates in parallel partnership with Waterlogic at point of use for bottled water cooler replacement, and Purezza for hospitality options, ensuring that transportation and resources are used as efficiently as possible.

Billi is GreenTag® certified\* (\*Eco and Quadra), providing a globally recognised guarantee that their products conform to the highest environmental standards.
